

Coax Cutting and Cutter Adjustment

Cut Depth Adjustment

- Step 1. Remove hex key from bottom of cutting tool and place the adjustment screws at the top as you look at the bottom of the cutting tool.
- Step 2. Adjusting left screw adjusts the first cut that is for the coax core wire.
Adjusting right screw adjusts the second cut that is for the coax shield.
- Step 3. Adjust in $\frac{1}{4}$ turn increments until desired cut depth is obtained.
