FT8 Message Creator

Only the first 13 characters of a message will be transmitted. The table below contains 13 columns making one line one FT8 message.

Placing Messages Into WSJT-X

- ☐ Step 1. Under the WSJT-X menu, select "Preferences..."
- ☐ Step 2. Click on the "Tx Macros" tab at the top of the Settings Panel.
- ☐ Step 3. Type in the desired FT8 message line from the table above.
- ☐ Step 4. Click the "Add" button to add the message line to the Tx Macros.

Using a Tx Macro

- ☐ Step 1. Click on the down arrow at the right of the fifth field under "Generated Std Msgs".
- ☐ Step 2. Select the desired Tx Macro to send.
- ☐ Step 3. Click on the next button when you are ready to send the selected Tx Macro.
