

# Integrating Digital Software With Applescripts: Contents

---

## **Applescripts**

This folder contains all the Applescripts described and used in the presentation. The scripts are organized under the top-level of “Ham Radio” just as shown in the presentation. This “Ham Radio” file is what should be placed in the computer’s main “Scripts” folder as described in the “Integration Manual.”

## **Applescripts Presentation**

A handout in pdf format of all the Powerpoint slides contained in the presentation.

## **Integration Manual**

A manual in pdf format that provides all the information necessary to effectively use the Applescripts of the presentation. Live links to all software and support materials are contained at the end of the manual.
